Parker Branham

Columbia, SC · Class of 2027 (Senior) · parkerbranham@gmail.com

parkerbranham.com | GitHub: OneRedPanda99 | LinkedIn: linkedin.com/in/parker-branham-9b32a5341/

Planning to study mechatronics engineering. Open to internships, tutoring, and project collaborations.

EDUCATION

Cardinal Newman School — Columbia, SC

Graduating May 2027 · GPA 4.34 weighted (SC Uniform Grading Policy), 4.48 junior year

Coursework: AP English Language (exam score 4), AP English Literature, Physics I Honors, Calculus Honors, Pre-Calculus Honors, dual-enrollment French. USC Summer Scholars: robotics and photography.

EXPERIENCE & ACTIVITIES

Founder & Owner — SC Pressure Point

Student-owned pressure washing, Columbia, SC · Started at 14; official spring 2026; paused summer 2026

Started taking jobs at 14 from Facebook referrals. Handled outreach, square-foot quoting, scheduling, and the work itself. Hired and trained a crew of three, completed about 20 jobs, and hand-built the business website (scpressurepoint.com) and CRM.

Stage Manager — Cardinal Newman Theater

2021 – Present

Backstage crew since 7th grade, Assistant Stage Manager for two years, now Stage Manager. Also the theater department's photographer.

Beta Club Robotics

Cardinal Newman School · 2021 – Present

Competed every year since 7th grade, building on the REV control system. Placed 4th with B.E.R.T., a beach-cleanup robot — the school's first placement in six years.

FTC Robotics — Founding Effort

Cardinal Newman School · 2026 – Present

Working to start a FIRST Tech Challenge team. Recruited about five students and a faculty advisor; working toward school approval. Not yet an official team.

Sales Associate — BeBeep Toys

2025

Helped shoppers, gift-wrapped, and ran the register at a local toy store; shared ideas with the owner for the store's website.

Server Administrator — Personal Project

2019 – Present

Home-hosted Minecraft server since age 10: static IP, BungeeCord proxy, Java plugins, Bedrock crossplay, and a Discord bot. Seven to ten regular players; about 80 members over the years.

Other: Aviation Club spokesperson; Beta Club member.

PROJECTS

Ghost Light — Theater Set-Change Tracker

A web app that shows the crew an animated ground plan of which set piece moves where in each scene, with move lists computed from scene to scene, a backstage dim mode, and 59 automated tests in CI. Built for my school's theater.

Clearline — Firebase CRM (unfinished)

A vanilla-JS web app with a Firestore backend that handled customers, jobs, measurements, estimates, and billing for SC Pressure Point. Worked through Firestore security rules, an access model, and a repeatable deploy. Development stopped when the business paused.

3D Design & Printing; Handwriting Plotter (in progress)

Fusion 360 CAD and FDM printing, from printed ball bearings to classroom materials. Building a handwriting data collector to train a model that writes like me on a pen plotter.

SKILLS

Fusion 360 / CAD · HTML, CSS, JavaScript · Firebase / Firestore · Java · Python (Flask) · GitHub Pages · Networking · Hiring & training · Photography (Canon A-1, Sony A6400)
